

# AI Visibility Audit

Find out exactly where your business stands in the eyes of AI search systems — and what to fix first.

## Why Your Business Needs This Audit

- Before a customer ever calls you, they may have already asked an AI for a recommendation. ChatGPT, Google's AI Overview, and Perplexity are answering questions about businesses like yours every day.
- If your digital presence is thin, inconsistent, or outdated, AI won't rank you lower — it will route the customer somewhere else entirely. You won't even know it happened.
- It's now estimated that over 70% of Americans are using AI tools for search — whether knowingly or unknowingly. Most small businesses haven't responded.
- The businesses showing up in AI recommendations share one thing: clear, specific, consistent information across every platform. Structure — not technology alone — is the real advantage.

- ✓ 90-Day Follow-Up Support
- ✓ Delivered in 7 business days

## The Opportunity Window Is Open Now. It Won't Stay Open Long...

Most of your competitors aren't thinking about AI visibility yet. The businesses that audit and strengthen their digital presence now will be the ones AI systems recommend first. This isn't about spending more — it's about getting your foundation right before the advantage disappears.
